Distributed Computing
Experiment / Assignment

Name :

Experiment/Assignment :

Title of Experiment :

Experiment / Assignment		
Concept	03	
Execution/Performance	06	
Viva / Oral	06	
Total	15	

Date of Submission: _____

Signature of Faculty: _____

CSL801.1	Develop test and debug using Message-Oriented Communication or RPC/RMI based client-server programs.
CSL801.2	Implement techniques for clock synchronization.
CSL801.3	Implement techniques for Election Algorithms.
CSL801.4	Demonstrate mutual exclusion algorithms and deadlock handling.
CSL801.5	Implement techniques of resource and process management.
CSL801.6	Describe the concepts of distributed File Systems with some case studies.
